Acknowledgements

Use non-numbered first level headings for the acknowledgements. All acknowledgements go at the end of the paper.

References

References follow the acknowledgements, use first level no-numbered headings. The bibliography should follow the *Chicago style*, see below for examples. The correct layout of the bibliography is obtained by the MMR stylefile as it includes the `chicago` package. To generate the list of references, use the command `\bibliography{myfile}` where the bibliography should be placed (assuming the bibliography database is named `myfile.bib`).

References should be formatted like this:
